

SWE Washdown Guns

Features

- **Variable Spray** Adjusts from soft spray to solid stream by simply depressing the lever.
- **Cover** The specially formulated rubber cover is resistant to a wide range of oils and chemicals, and has long term weather resistant properties.
- **Replaceable** The heavy duty rubber cover is replaceable and protects both the nozzle and surrounding equipment from dings and scratches.
- **Lever** The rear mounted lever eases operation on extended periods of use, preventing cramping of the fingers.
- **Conserves Water** Upon release of the lever, the operator is assured of a drip tight shut-off.
- **Construction** The heavy duty construction ensures an extended life under severe service conditions. The 151 is designed for harsh environments.
- **Adaptors** Washguns are supplied with swivel hose adaptors.
- **Stainless Steel Seats** Long lasting stainless steel seats are furnished in each gun.
- **Range** 151 Washdown guns are available in aluminium, stainless steel, and bronze bodies to suit a wide range of applications.
- **Made in the USA**
