

Performance driven OPE belts that work as hard as you do.

Features/Advantages:

- Aramid cord is extra strong and durable
- Premium rubber compound provides long belt life
- Smooth clutching cover for shock-loaded, backside-idler drives
- Superior shock resistance
- Resists rollover
- Oil and heat resistant
- Proudly made in the USA

Markets:

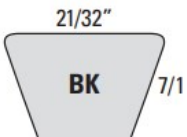

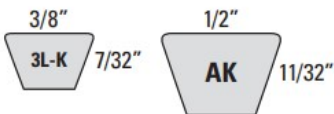

- Outdoor power equipment

Applications:

- Lawn mowers, edgers, snow throwers, tillers, shredders, splitters and more

Sizes:

- 3L, A, B cross-sections
 - 3L sizes use industry standard part numbers ending in K
 - Classical part numbers begin with AK, BK

- 1 Aramid Tensile Cord**
Carries load with extraordinary strength and durability
- 2 Premium Rubber Compound**
Specially formulated compound for long belt life
- 3 Clutching Cover**
Superior fabric for smooth clutching and resistance to rollover

Note:

When Aramax belts are used as a matched set, all belts must have the same SAG number. These high modulus aramid cord belts require closer matching than standard belts in order to tension properly and work together as a set.

Specifically designed for outdoor power equipment with heavy shock loads.

Aramax® Xtra Duty v-belts are engineered for lawn and garden equipment as well as aggressive applications with heavy shock loads. The rugged belts feature Aramid cord that is stronger than steel. It's durable and won't stretch. A brown smooth clutching cover is designed to handle shock loaded, backside-idler drives. A premium rubber compound and high performance construction delivers high horsepower and long service life. Aramax v-belts are optimized for demanding applications like mowers, snow throwers, tillers, shredders and splitters. Proudly made in the USA, the belts are oil and heat resistant. Aramax Xtra Duty v-belts are available in 3L, A and B cross sections.
